Introduction

Why did we choose this problem? (for contractors)

- Can't locate healthy restaurants
- Various options of eating
- Time issues
e.g Homework, Exams

Problem: A local Victoria alternative resource for people interested in a healthy lifestyle.(for customers)

- How to eat wisely
 - Quickly
 - Delicious and Health
- Different meals for different type of users
- Add reviews or feedback to a local restaurant
- Add friends to motivate each other to eat together
- Sharing the restaurants or meals you like

Objective

To let anyone with a smartphone would be able to take advantage of our application but we would like to focus on these specific groups to start:

- University/College Students who live alone
- Busy commuters
- Single parents

To create an app for food delivery and it includes the following functions:

- Save user information to reuse
- Cooperate with local restaurant and list their menus on app
- Users can make payment on our app
- User can share or give an evaluation to a restaurant or a particular meal

Requirement

HealFood(app)

Approach

- Low Fidelity Prototype with use cases
- Client Meeting
 - Test our prototype
 - Recording the feedback and fix bugs
- High Fidelity Prototype
 - Final test among a number of users
